Featured Projects

Full Stack Engineer & Designer

[Lambda Door - a React application and PWA aimed specifically at Lambda students searching for a job](#)

Team: Remote International, AGILE

Involved in defining product strategy from initiation to completion. Created wireframes and prototypes, conducted user research and testing. Coded both the front and back end as part of a remote team. Delivered responsive design. Presented the final product to the engineering manager.

Skills & Tools

Wireframing, Responsive Web Design, UI Design, User Research, Digital Photography, Copywriting, Personas, Scenarios, User Journeys, Figma, Adobe Photoshop, Git, HTML, CSS, Javascript, React, Redux, Gatsby, Node.JS, PostgreSQL, Python, Jest

Talents

- I'm a strong communicator and a personable and motivated collaborator.
- I have a deep sense of empathy and a passion for creating human-centred, meaningful experiences.
- I'm a creative ideas person, able to see the bigger picture but with a focus on attention to detail where needed.
- I'm driven and adaptable and I work hard to deliver what is needed, when it is needed.

Back End Architect & Developer

[Local Park Passport - a portal to enable users to find and rate local parks](#)

Team: Remote International

Developed a RESTful API with full CRUD functionality from scratch. Designed and built SQL database and API schema. Implemented automated testing.
